Accidents in Coastal Water

An Empirical Inventory of Accidents from the Indian Coast

This book addresses the needs of professional and academic researchers in the subject of accidents in Asia. This is the first book of its kind and features color illustrations done by the authors in Asia. This book provides a brief overview of accidents in addition to both the taxonomy and distribution of accidents along India's southern coast. It also opens a new arena for marine researchers in the field of accidents in Asia. This book is the outcome of the authors' 15 years of research experience in the field of accidents, making it very helpful for researchers, coastal planners, port authorities and the proper management of coastal thermal plants and atomic power plants.
